

Don't bin it!

Low energy light bulbs use up to 80% less energy than old-fashioned bulbs, but to do this, they need a small amount of mercury.

If we all recycle, we can save our environment, and the mercury, glass and metal can be reused... but to do this, we need volunteers.

Could you spare an hour each month? If so, you could become a CoBRA community pioneer. We'll supply you with a collection box to put in your local shop, post office or community centre. When it's full, you just need to take the contents to a local bulking up centre... *it's that simple!* Just visit the website below.

CoBRA is a multi, national award winning initiative in partnership with Recolight.
